Profile Summary

Computer Science Engineering student with strong skills in web development, software engineering, AI, and blockchain technologies. Proficient in React.js, JavaScript, Python, Flask, and Firebase, with experience building real-world projects and scalable applications. Leverage technical expertise, advanced problem-solving skills, and a commitment to continuous learning to drive innovative solutions and enhance performance within technology teams.

Experience

Freelance | Webreelstudio **2026 – Present**

Independently managed end-to-end project delivery, client communication, and quality control developing strong process management and operational efficiency skills.

Web Developer Intern | Centaur Digital **May 2026 – Jun 2026**

Collaborated directly with the Tamil Nadu Small Industries department to drive core initiatives, achieving 40% improvement in project efficiency. Collaborated closely with industry professionals implement functional web solutions, demonstrating hands-on experience in project development.

AI Intern | Skilleareum **Nov 2025 – Dec 2025**

Completed a technical internship focused on Agentic AI and Gamification within a decentralized ecosystem, contributing to the development of two new features and enhancing user engagement by 20%. Applied theoretical knowledge to practical problem-solving while collaborating with a remote team.

Projects

Valter.ai | [Next.js, React, Tailwind, CSS, Antropic SDK, TradingView]

Engineered an AI-Powered Stock Analysis Platform designed to equip investors with actionable, data-driven market insights. Developed comprehensive tools for real-time Portfolio Tracking and advanced Financial Analysis to empower and streamline investment strategies.

PrepareView | [Flutter & Dart, Google Gen AI, Supabase]

Built an AI-powered mock interview app with personalized learning paths and performance evaluation. Developed an Interview Readiness Score using tone, clarity, and STAR framework analysis. Added gamification features to boost user engagement and practice consistency.

DisasterReliefRail | [React, Stellar SDK, Freighter, Vercel]

Built a Stellar Testnet dApp with Freighter wallet integration, real-time XLM balance tracking, and testnet payments. Added Stellar Expert verification and Friendbot funding for streamlined Web3 testing.

Carbon Footprint Predictor | [Python, XGBoost, SHAP, Streamlit]

Engineered an ML pipeline predicting corporate Scope 1 & 2 GHG emissions for non-disclosing companies using financial proxies, training and comparing 6 regression models with R^2 above 0.75.

Technical Skills

HTML/CSS, React.js, Java, Python, Tailwind CSS, Flutter, Rust, REST APIs, GIT

Achievements

- SEBI TechSprint 2026 - Jury Award Winner
- Top 100 - Codex Nightline Metro Hackathon World's First Hackathon in a Moving Metro
- VIT Chennai Hackathon (DEFY 26) Finalist among 50+ teams.
- Completed Japanese Language Proficiency Test (JLPT N5)
- Cisco Certified Network Associate (CCNA)

Education

BE Computer Science Engineering **CGPA : 7.1**

Chennai Institute of Technology 2024 - 2028
